Devine Engagement Survey™

Improve workforce productivity and commitment

Devine Engagement Survey

- Would you like to know how satisfied your employees really are with their jobs?
- Do you ever feel unsure about your workers' commitment levels?

The Devine Engagement Survey provides organizational leaders with valuable insight about employees' feelings and attitudes by giving employees the chance to anonymously offer their opinions about their workplace environment. The information gained through this process provides opportunities for improvement and increased business success.

It is no secret that engaged employees:

- Are more productive and proactive
- Are more involved with and committed to an organization
- Make decisions that coincide with their organization's strategic goals
- Often go the extra mile to contribute to an organization's success

Most importantly, research shows that maintaining engaged and committed employees leads to higher levels of customer satisfaction and loyalty.

Devine Engagement Survey provides leaders with valuable insight about employees' feelings and attitudes toward their workplace.

THE DEVINE GROUP

Survey questions

In addition to measuring job satisfaction, involvement and commitment, Devine Engagement Survey measures seven different areas linked to employee engagement:

- Job content
- Work group
- Work role
- Rewards
- Supervision
- Top leadership
- Innovation and problem solving

Devine Engagement Survey

Benefits of employee engagement

The Devine Engagement Survey provides actionable suggestions to improve employee engagement within your organization. By going beyond just measuring attitudes, companies can realize the value of an engaged workforce by making subsequent changes that have real bottom-line results.

Devine Engagement Survey is an indispensable assessment tool that will help uncover your organization's strengths and hidden vulnerabilities. This knowledge can then be systematically applied to increase employee engagement and workplace efficiencies.
